

GDC Collection

DEVELOPMENT ROADMAP

MVP Start

Q2 2021

Installation of the first containerized PoW regenerative mining center for Bitcoin (BTC).

MVP Validation

Q3 2021

First GREEN BITCOIN is generated with energy from regenerative renewable energy sources (biogas from organic waste).

Regen Certification

Q4 2021

Validation and audit of offset CO2 emissions.

Certifier: OCA GLOBAL

1 BTC = -94.11 Tn CO2

GDC Collection NFT

Q1 2022

Design of the NFT using artistic watercolor technique and commemorative digitization of the world's first mined Bitcoin with a balance of negative CO2 emissions, by the artist "Slumil".

Airdrop 1

Q2 2022

It corresponds to 94.11 M NCB (Negative Carbon Balance) tokens, representing the tokenized and guarded emission right of 1 Tn/CO2 for each NCB token listed.

Airdrop 2

Q2 2022

Corresponding to the first GREEN BITCOIN (BTC) in history, mined with a negative balance of CO2 emissions equivalent to planting 565 new trees.

Airdrops 3 & 4

Q3 2022

3rd airdrop corresponds to 2.00% and the 4th airdrop corresponds to 6.00% of the sale of all "GDC Regenerative Collection" NFTs, Perpetual Regenerative Mining Hosting.
